

THE INSTITUTE OF  
**Healing Arts  
and Sciences, LLC**  
The W.I.S.E. Method™

**Are you tired of just surviving?  
Are you ready to LIVE?  
Take life to the next step.  
Come to the Institute of Healing Arts and Sciences, LLC**

## **Information Session Description**

### **Background**

The Institute of Healing Arts and Sciences, LLC (IHAS) is the premier Energy Medicine school in the Northeast, specializing in The WISE Method™, created by IHAS Founder and President, Dorothy Martin-Neville.

IHAS is a recognized leader in complementary medical education, treatment, and research, promoting greater visibility, credibility and acceptance of energy medicine among healthcare professionals and the general population. We provide both a 4-year Energy Medicine Practitioner Program and a 2-year Energy Medicine Certificate Program approved by the CT Commissioner of Higher Education, as well as numerous other offerings, such as Personal Growth through Self-Discovery and varied workshops and seminars.

For those already in the healing arts, IHAS training takes practitioners to the next level in their healership; for those just starting out in their journey, we introduce you to the world of healing as a natural inborn capability of us all. The curriculum has a 2-fold focus: one is the students' personal growth and the understanding of the role that defenses and fear play in illness. The second encompasses extensive training in hands-on techniques with experiential practice under close supervision and guidance from highly trained teachers and teacher assistants.

We invite you to explore a new and profound understanding of Energy Medicine. Here you will learn **The W.I.S.E. Method™** of healing using Wholistic, Integrative, Spiritual, Energies to create a multilevel approach to healing. Our students learn groundbreaking protocols currently being used by the National Institutes of Health in the forefront of CAM research and practice.

Graduates go on to private practice, working in medical facilities and doctors' offices, and many other venues. Others are choosing to help IHAS develop innovative programs and collaborations with the medical community, corporations, and other ventures, providing healing services to organizations throughout their local community.

You decide your pathway.

### **Information Session: What to expect**

Join us in a free Information Session:

- The history of IHAS, and Dorothy's unique qualifications to head this school
